

# OUR GREEN PLAN

2023 - 2038

**Our aim is to be Net Zero\* by 2038**

*to protect our planet and to slow down climate change.*

## How are we going to achieve Net Zero?

### Reduce our fuel consumption

by replacing: our maintenance vehicles with electric vehicles and promoting active and sustainable travel

### Reduce our energy consumption

by replacing lights with LED lights, exploring better ways to control our heating system and using more renewable energy

### Reduce our waste

by understanding how much waste we produce, so we can reduce this through alternatives such as recycling

### Encourage staff and teams to go green

by identifying staff to join our 'Green Team' and for all teams to engage in a green plan with specific commitments
